

DL Flyer

Double Sided

Portrait

210mm x 99mm

Bleed Area

You will need to extend your design to fill the bleed area. This area will be trimmed to avoid unwanted white lines appearing during the print finishing stage.

Trim Line

This is where we will trim your design to the finished size. Any part of your design placed on or outside this line will be cut off.

Safe Zone

The safe zone is 3mm inside the of the trim line. It's advised that all important elements and text are kept within the white area.
